3MW

4,5MW

6MW

Hybrids

MHYB (2+ internal compartments)

HYBRID containers are a combination of all other series. Custom made to fit those irregular spaces and otherwise unfittable parts of the land.

Seria JB

JBOX 2.4

JBox 2.4 has been designed especially for our customers owning high bay storage warehouses as it sits on three Euro pallets. It has also gained popularity among garden owners, self-storage community, as well as backyard users due to its smaller size.

What makes it different from our other series?

- it sits on three Euro pallets perfectly and its solid construction allows for safe and secure storage of goods;
- the 32 mm tongue and groove joint floor has been reinforced to provide better stability of the entire box during movement;
- thanks to modern solutions, the hinges do not need to be adjusted after each move;
- 70mm high floor profiles allow for an easy transport by forklift;
- it is equipped with specially designed, 3mm thick corner plate horns which not only strengthen the structure of the whole container, but also allow for a transport by crane;

JB Series

JB2.4

220 kg

3 fitters
~45 min.

GRGBOX 2.3

GRGBox 2.3 is a sensational solution for every garage or parking space owner. It will fit a lot of things that are not usually destined for storing at home like garage necessities, small sport equipment or even tires. Specially designed bracket is useful with chaining up a bicycle or a stroller. Additionally, the height of the base is adjustable allowing for the hood of any car to fit under the trunk of a box, which in turn helps using the whole space comfortably.

Product features

- Warranty: 2 years.
- Material: 1mm-2mm thick, galvanized steel sheet in 1st class.
- Triple bolt lock.
- Ergonomic handle for convenient opening and closing of the box.
- Adjustable height of the base facilitating the fit under the trunk of the box.
- Built-in levelling system.
- The flap equipped with two pneumatic cylinders for easy lifting.
- Included: two shelves and a bicycle / stroller bracket.
- Possibility of adding more accessories such as shelves or hooks.
- Load capacity: 400 kg.
- Capacity: 1.84 m3.
- Quick assembly with the help of a precise User Manual.

155 kg

2 fitters~15 min.

Dimensions:

Width
2280 mm

Length
900 mm

Height
1700 mm- 2100 mm

Trunk dimensions:

Width
2280 mm

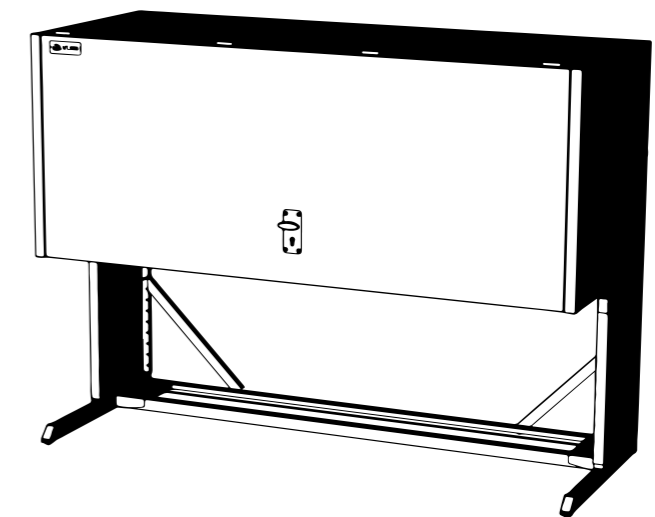

Length
900 mm

Height
900 mm

Height (floor to base of the trunk)
800- 1200 mm

Doors

Specially reinforced door wings guarantee their high rigidity and safety.

Corners

3mm thick corner plate horns not only strengthen the structure of the whole container, but also allow for a transport by crane. The mandrels allow the containers to be stacked up.

Casement Bolt

Our self - designed locking system ensures easy operation and provides extra security.

Gutter

Innovatively designed gutter of increased capacity, equipped with a system against rainwater overflow.

Floor

Our containers are equipped with **impregnated**, 32 mm thick, tongue and groove joined floors.

Transport ready package

Our containers can be folded and stacked which saves space and reduces transport costs.

Loading / Unloading

70 mm floor profiles allow for a transport by forklift.

Stacking up

Innovative method of stacking containers up, allowing for additional storage area space.

CUSTOMIZATION

We offer custom color coating of elements, such as doors and corners which lets our customers stand out from the competition, but at the very least adds a unique character to their business.

Burglar-Proof Bar

Assembled at customer's request. Increases security against burglary.

Inclined Plane

Allows for an easier loading/unloading in and out of the container.

Upright Mast

Specially designed mast, perfect for attaching lights and monitoring cameras.

Staircase

The stairs and railing system.

Investment in the Self-Storage Industry

There are thousands of Self-Storage facilities currently operating in Europe, but the market is still hungry for this type of investments.

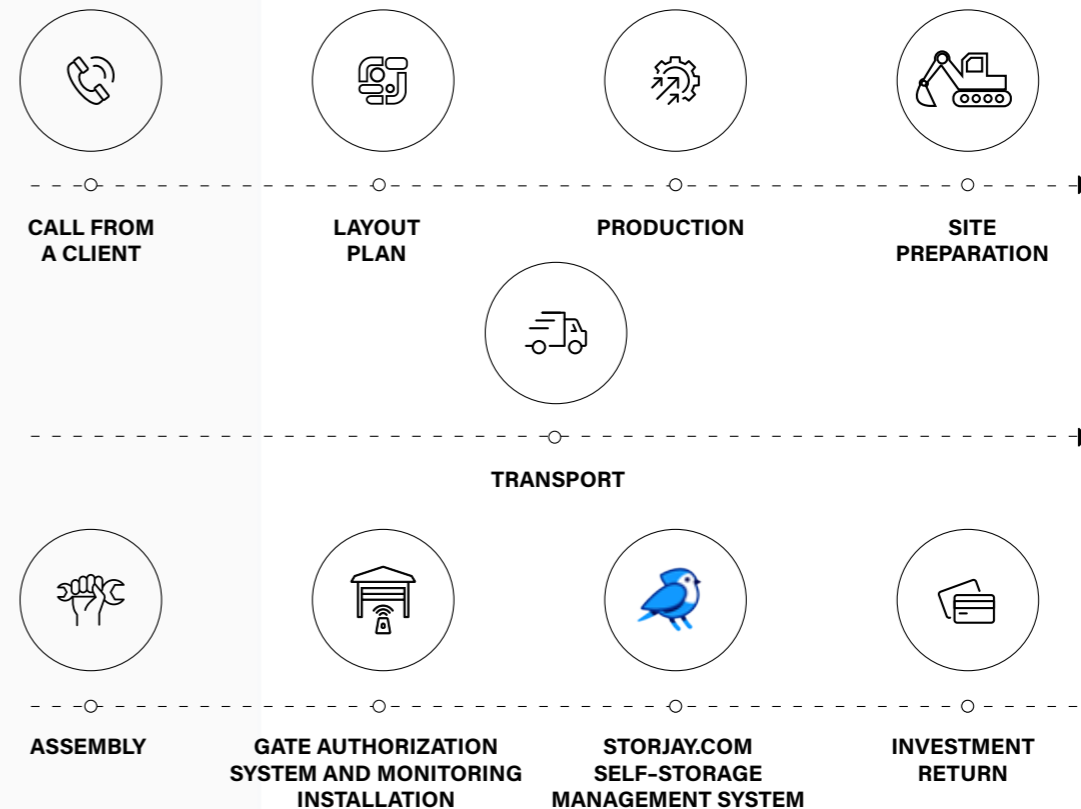

What makes it worthy of investing in Self-Storage?

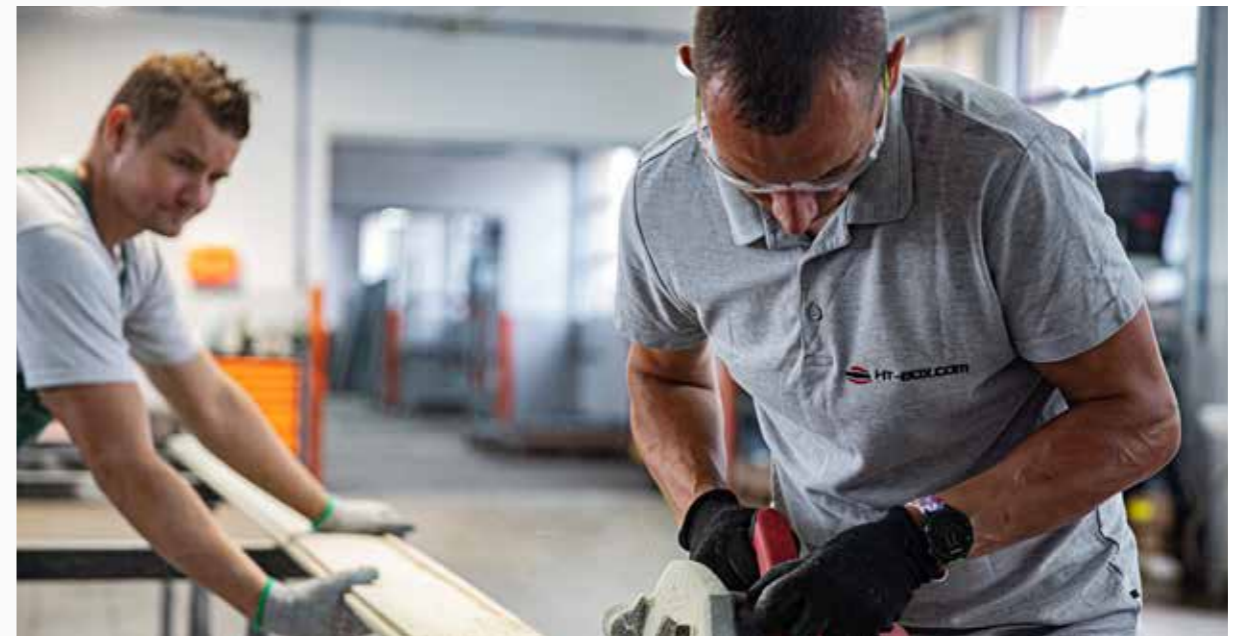

For over a decade now, Self-Storage has been outperforming retail, office, apartment and industrial renting as storage spaces are mostly basic construction and cheaper than commercial real estate.

- Fast-growing industry
- High demand
- Passive income business model
- Low maintenance costs
- Opportunity for rapid growth and expansion
- High return rate

Investment components:

- Owned or leased land/facility/warehouse
- Site preparation
- Fencing of the property
- Gate and its authorization system installation
- Assembly of HT-BOX.COM storage containers
- Installation of a monitoring system
- Implementation of the IT management system - STORJAY.COM

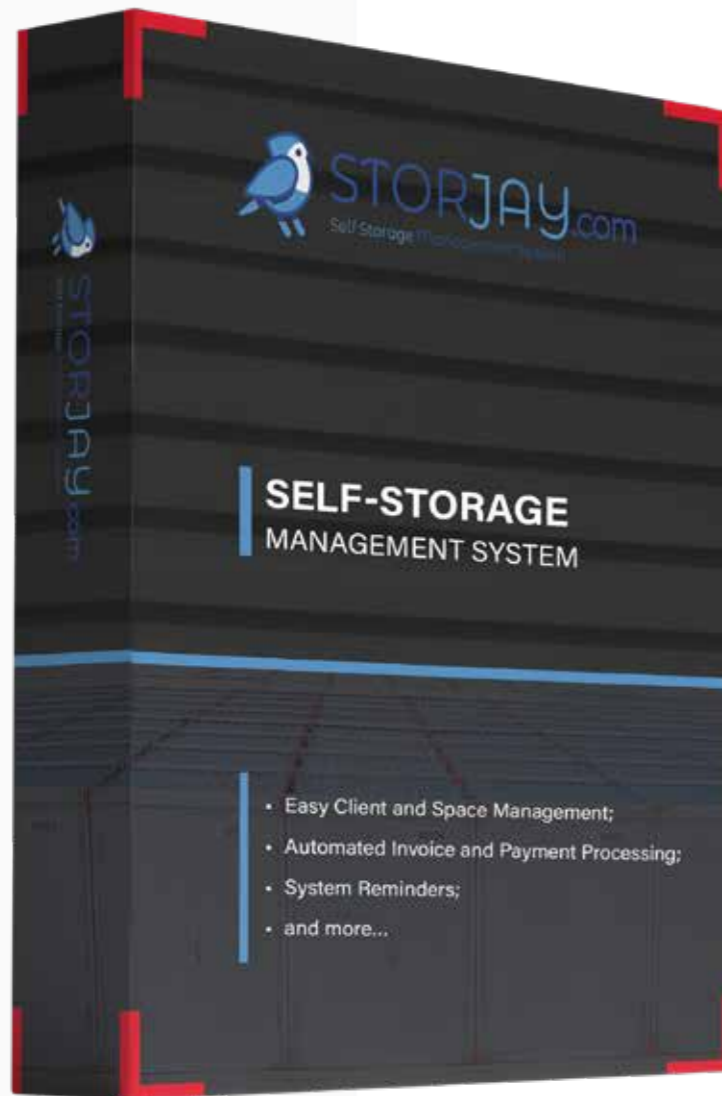

ASSEMBLY

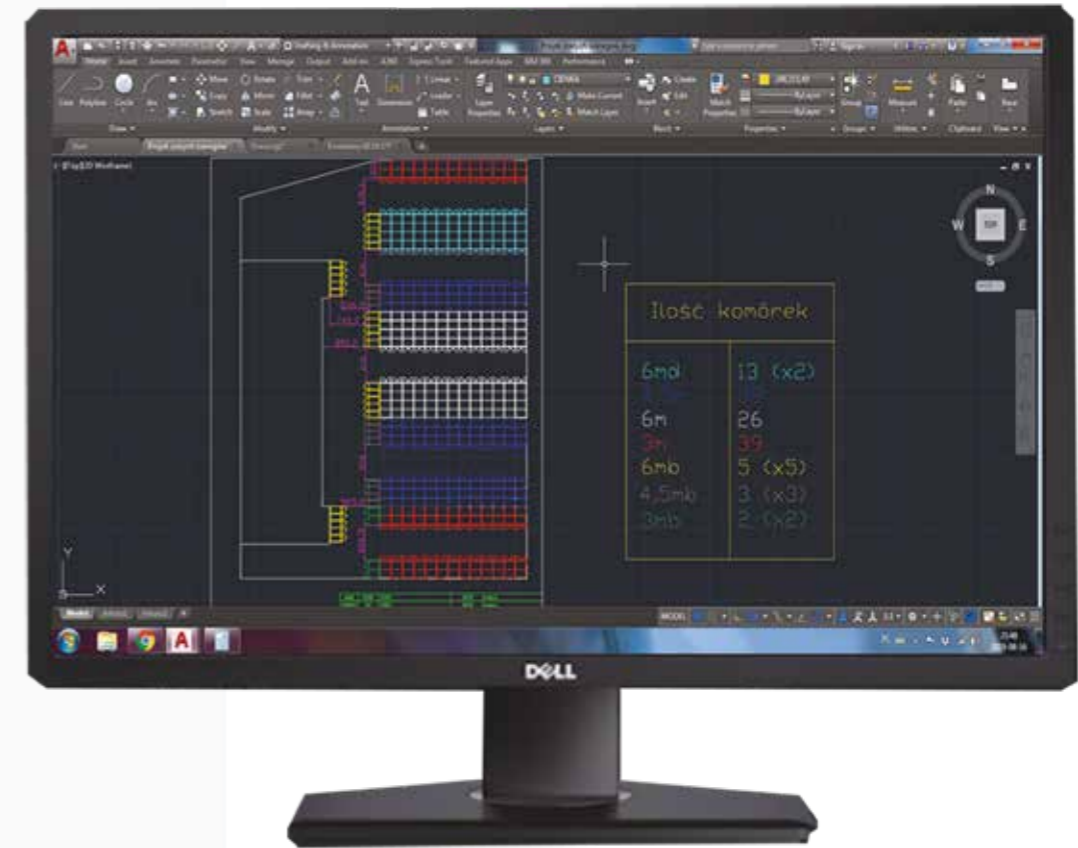

SELF-STORAGE MANAGEMENT SYSTEM

Designed and developed by us, **STORJAY.COM** software creates many possibilities in the field of container and storage space rental management. For more information, visit our website at www.storjay.com or contact us directly at: **+48 507 508 611**.

PROJECT SUPPORT

Knowing how difficult it is to imagine the final appearance of the project, we introduce a plot/facility arrangement service. Our team will help and suggest the optimal use of space and selection of appropriate containers for a specific location.
